Professional Summary

Computer Engineering professional with a strong foundation in mathematics, algorithms, data structures, and applied software development. Demonstrates analytical problem-solving ability, system-level understanding, and a research-oriented approach while working with modern frameworks, databases, and APIs.

Education

Aligarh Muslim University, Aligarh, UP, India	2024-2026
M.Tech (Computer Engineering)	GPA: 8/10
Aligarh Muslim University, Aligarh, UP, India	2019-2023
B.Tech (Computer Engineering)	GPA: 7.6/10

Technical Skills

Programming Languages: Java, JavaScript(ES6), C, C++, Python
Frameworks/Libraries: Spring Boot, JPA, Hibernate, Maven, Microservices, React.js
Tools/Technologies: HTML, CSS, IntelliJ, Postman, Docker, Git, MS Excel, SQL
Cloud/Databases: MySQL, PostgreSQL, H2
Operating Systems: Linux, Windows
Relevant Coursework: Data Structures and Algorithms, Operating Systems, Digital Logic, DBMS, Artificial Intelligence

Work Experience

SDI – (Software Developer Instructor)	April 2026 – Present
NxtWave, Hyderabad	Onsite
- Conducting live technical sessions on JavaScript, web development, problem solving, and programming fundamentals for students. - Mentoring students in coding practices, debugging, assignments, and concept understanding.. - Simplifying complex technical concepts through interactive teaching and practical demonstrations. - Collaborating with academic teams to deliver structured learning content and maintain student engagement.	
Intern – Software Engineering	Dec 2025 – March 2026
SpiceJet, Gurugram	Onsite
- Worked on enterprise-level PFMS (Public Financial Management System) modules involving both front-end and back-end development using Spring Boot and React.js. - Designed and implemented secure REST APIs and responsive UI components to support financial workflows. - Utilized Excel for financial data analysis, reconciliation, and reporting to ensure data accuracy. - Collaborated with cross-functional teams to improve system reliability, workflow efficiency, and data consistency.	
Teaching Assistant, Department of Computer Engineering	Aug 2024 – Dec 2025
Aligarh Muslim University, Aligarh	
- Python Programming Lab (Aug 2024 – Nov 2024, Aug 2025 – Nov 2025): Guided students in Python fundamentals, logic building, functions, file handling, and hands-on programming exercises across two semesters. - Data Structures Lab (Jan 2025 – Apr 2025): Assisted students in implementing core data structures (stacks, queues, linked lists, trees, graphs) and understanding complexity analysis and debugging.	

Projects

Adult Content Monitoring and Blocking System with Phishing Detection	Present
Software Release Link APIs Link	
- Architecting and developing a hybrid security application for online-offline adult content blocking and phishing-aware content detection. Connect Cloud decision APIs enabling remote allow/block actions via secure email links with real-time status synchronization. - Packaged the complete solution into a single-click Windows installer with background execution, auto-start configuration, and zero manual setup for end users. Tech Stack: Python, OpenCV, XGBoost, NudeNet, Firebase Firestore, Serverless APIs (Vercel), REST APIs, Windows Internals, psutil, PyInstaller, Inno Setup, SMTP/Email Services, Twilio SMS API.	

Meeting Notes Summarizer

Sept 2025

Live Link

- Developed a **full-stack AI-powered** web application using Spring Boot (backend) and React.js (frontend) to summarize meeting transcripts into concise bullet points and action items.
- Integrated Grok LLM API for prompt-based text summarization, enabling users to customize summaries as per meeting requirements and email functionality to send generated summaries directly to recipients, improving collaboration and productivity.
- **Tech Stack: Spring Boot, React.js, REST APIs, Grok API (LLM), Email Service, Vercel.**

Ecommerce Backend System

July 2024

GitHub Link

- Implemented a **robust and scalable backend system** for an e-commerce platform supporting core functionalities such as product catalog management, user accounts, orders, and carts.
- Created secure and efficient **RESTful APIs** to manage customers, sellers, products, and order workflows, ensuring data consistency and smooth end-to-end shopping operations.
- **Tech Stack: Spring Boot, Tomcat, JPA, Hibernate, MySQL DB, Apache Maven, IntelliJ, Postman.**

Face Recognition Attendance System

Feb 2023

GitHub Link

- Built a **face recognition-based attendance system** to automate real-time attendance marking for educational institutions and workplaces, reducing manual effort and errors.
- Linked automated attendance logging with **Excel and MySQL** for efficient data storage, retrieval, and report generation.
- **Tech Stack: Python, OpenCV, NumPy, Haar Cascade, LBPH, MS Excel, MySQL.**

Certifications

Accredited with 85% Score in **Mathematical Foundations For Machine Learning (Nptel)**

Trained in **Java & DSA** (Apna College)

Certified in **Full Stack Java Development** (Udemy)

Achievements

Qualified **GATE CSE** in 2023 and 2024 with a score of 458

Achieved **99 percentile** in **Physics** in JEE Mains 2019 (Score: 112/120)

Secured 2200 rank in **UP AKTU Engineering Entrance Exam**

Got 170 rank in **AMUEEE Entrance Exam (2019).**
